

# 2025 BEEKEEPING SUPPLY CATALOG

*Beeline*

---

Connecting Bees and Their Keepers

**Welcome to Beeline,** your supplier for all your bee-keeping needs! Whether you are a hobbyist or a commercial beekeeper, we are here to help you grow and succeed in your passion and care for bees!

We are independently owned and operated businesses, working together to provide you with the same products, same quality, and same service all across the United States. The Michigan Branch uses Eastern White Pine and the Washington Branch uses Ponderosa Pine. We do not have a central headquarters.

Contact us or shop online and get free shipping for most products over \$150 at [www.beelinewoodenware.com](http://www.beelinewoodenware.com). Or you can contact your nearest branch for all catalog requests, product questions, order placing, and dealership inquiries. If one branch receives an order from someone in another branch's territory, all information will be transferred to the nearest branch so that you receive the cheapest shipping option possible.

Our Beeline staff is ready to answer any questions you may have about bees, beekeeping, and our products. Across this page, find contact information, directions and maps for all branches. We welcome you to come meet us and purchase at our stores!

# Beehive Parts

## What's this stuff like?

We'll describe our woodenware as well as we can and hope your purchase matches your expectation. Want something we don't offer? Custom projects and modifications will be considered.

### Wood grade options:

Woodenware grades have historically been divided into three grades—select, commercial, and budget. Those grades are all still available from Beeline, however, in this catalog we are providing pricing for only two choices that we have found to be most popular—commercial and mill-run. If you are interested in select or budget, feel free to contact us.

**Select** is available at higher prices and is as near to perfect as we can humanly and practically get it. We aim for no knots, splits or milling defects. Some variation in the width of box panels, due to unavoidable shrinkage after milling, can occur. Handholds may have a little chipping at the end.

For **Commercial**, our objective is structural soundness. There will be no holes or potential holes, large splits or milling defects. We attempt to keep knots at least 1 1/2" from nailing areas. Knots, sometimes rather large, are allowed within the panel and on top and bottom edges as long as they are structurally sound.

We attempt to turn the best face out and pass it by commercial standards. Missing knots on the inside of the edges are permitted as long as half of the thickness of the panel is sound. We try to avoid knots in the handhold area. There may be some variation in panel width due to post-milling shrinkage.

**Millrun** is roughly 50% Commercial and 50% Budget. Many panels are clean and knot free. However, minimal milling defects and large knots are allowed. When you get millrun, you can be pretty confident you are getting structurally sound woodenware for cheaper prices than Commercial.

**Budget** is the lowest grade. This grade will contain milling defects, splits and large knots, except in nailing areas. In general, our budget has all the structural soundness and functionality of commercial.

Since we generate this grade by grading down from better grades, or its worked into mill-run, it is an accumulative product and frequently unavailable. Contact us for availability and pricing.

### Assembling

If you choose to assemble yourself, we recommend several methods for fastening our products. Please ask for our free Assembly Instructions

Booklet. Also, see pages 35 & 36 of this catalog for some of our suggested fasteners.

When we assemble, we use jigs, some automated machinery, and other methods to ensure a square and correct finished product. We fasten everything with staplers. Frames and Inner Covers are glued and stapled. If you desire other products to be glued, we can do so for an extra fee but we find our joints, stapled or nailed well, do not need glued for longlasting structural and functional integrity.

Keep in mind that assembly adds considerable bulk to a product and incurs higher shipping cost.

### Copper-Dipping

Copper-dipping uses a copper mono-ethanolamine solution that inhibits rotting by soaking into the joints, end grain, and staple penetrations. It can be painted with any good grade oil or latex paint. Only available from the Michigan Branch.

### Painting

We will attempt to give you the most economical, quality job possible, by using a good grade latex for two coats. We spray boxes on a stack which means that the upper and lower surfaces do not get painted. Lids and bottom boards get complete first coats. Sides and exposed surfaces are given a second coat. Because inner covers are usually not exposed we do not offer painting on them.

Our standard paint color is white and is used unless otherwise specified. We can do any other color using basic color chips for reference, for an extra \$50 per color (non-white) per job.

We attempt to allow plenty of drying time before shipping your painted product but it is impossible to ensure that they will arrive with no damage. If you desire touch up paint we can arrange to send some along.

### Wax Dipping

This is not a quick dunk into liquid paraffin. This is not wax coating. It is wax impregnating. Every part of the wax dipping process has been optimized for maximum longevity. Using a special micro-crystalline wax formation that is heated to 300°, the component is submerged for 3 minutes. The wax is forced into the wood and the moisture and other "unfriendly" chemicals are forced out. The result is a component that will last up to 20 years with no maintenance. Though it cannot be painted, the natural appearance of wood is preserved and it will not rot or deteriorate.

## Introduction to Hive Parts

### COVER / LID

The roof for your hive to keep the bees snug and dry. Beeline offers six styles. The Garden styles look nice in your back yard garden. The Telescoping Lid (pictured here) or the plastic Ultimate Hive Cover is most common for a back-yard beekeeper. Migratory or Plywood lids are made for commercial beekeepers stacking their hives on pallets.

p. 22,23

### INNER COVER

Buffer between lid and bees; can provide ventilation, especially if the Screened Inner Cover is used. The raised panel style (shown here) is the most common. Flat-sided inner covers work similarly. The Screened Inner Cover is used mainly for ventilation in summer months.

p. 24

### TOP FEEDER

Used for feeding large quantities of syrup in early summer and late fall months. Inboard feeders and other feeding options are also available. A bag with several pin pricks set above the Brood Chamber works best for clusters.

p. 43

### SHALLOW SUPER

A super is where the bees put the honey. Beeline offers two sizes, but we recommend each beekeeper choose a size and stick with it. The shallow is nice for ladies or the elderly who do not wish to carry much weight. It also works well for comb honey. We also offer plastic or wax foundation for shallow frames.

p. 13

### MEDIUM SUPER

A super is where the bees put the honey. Beeline offers two sizes, but we recommend each beekeeper to choose a size and stick with it. The medium size is the most common super. We offer plastic or wax foundation for medium frames.

p. 12

### QUEEN EXCLUDER

A metal gridwork with slots large enough for worker bees, but too small for the queen; excludes the queen from laying eggs in the honey super.

p. 28

### DEEP HIVE BODY

The brood chamber is year-around home for the bees. Often two deeps (also called brood boxes) are used to give the queen more room to lay her eggs. In winter you will reduce the hive to one or two boxes so that the bees can conserve their heat. Beeline offers either plastic or wax foundation for the frames.

p. 11

### BOTTOM BOARD

The base of your hive, and "front door" where the bees enter and leave the hive. Beeline has two styles to choose from. The Screened Bottom Board (pictured here) is nice for ventilation and with the Mite Tray, is useful for monitoring your mite count. The Reversible style is the standard bottom board.

# Beginners Kits

## Deluxe Starter Kit

Literally everything you need for the first several months of your beekeeping venture! Complete with your first feeding supplement, mite treatment and your basic tools.

**Contains:**

- 1 Telescoping Lid
- 1 Inner Cover
- 1 Finger Joint Medium Super
- 10 Medium frames  
(Assembled with waxed plastic)
- 2 Finger Joint Deep Hive Bodies
- 20 Deep frames  
(Assembled with waxed plastic)
- 1 Screened Bottom Board
- 1 Screened Bottom Board Tray
- 1 Queen Excluder
- 1 Entrance Reducer
- 1 Inboard Feeder
- 1 Hive tool
- 1 Beeline Smoker
- 1 Roll of Burlap Smoker Fuel
- 1 Bee Brush
- 1 pair of Goatskin Gloves:  
(You specify size)
- 1 Protector Bee suit:  
(You specify size)
- 1 book: First Lessons in Beekeeping
- 1 Cup Honey B Healthy
- 1 Sugar Roll Kit
- 1 Formic Pro 2-Dose Pack
- 1 Frame Perch
- 2 Pollen Patties
- 1 Mouse Guard

## Honey Harvesting Kit

Does honey harvest bring a sense of excitement mixed with overwhelm at what it takes? Start here! We have a kit to meet the needs of your first harvest, complete with a case of jars!

**Contains:**

- 1 E4 Crank Honey Extractor
- 1 Hive Butler Uncapping Tank
- 1 5-Gallon Bucket with Honey Gate
- 1 Dozen 1 lb. Glass Jars
- 1 Uncapping Knife with Controller
- 1 Honey Scratcher
- 1 Double Strainer

SHIP WT: 57 #	CAT#	Price
Painted	HHK	652.14

**Orange Prices Qualify for Free Shipping on Orders over \$150!**

**Beginner's Starter Kit**

Get all the equipment needed to start beekeeping, in one package! Choose assembled or painted for the hobbyist that would rather not assemble but wants to lend his help to beleaguered bees. Great gift idea.

**Contains:**

- 1 Telescoping Lid
- 1 Inner Cover
- 1 Finger Joint Medium
- 10 / 8 Medium frames  
(Assembled with waxed plastic)
- 1 Finger Joint Deep
- 10 / 8 Deep frames  
(Assembled with waxed plastic)
- 1 Screened Bottom Board
- 1 Screened Bottom Board Tray
- 1 Entrance Reducer
- 1 Entrance Feeder
- 1 Hive tool
- 1 Beeline Smoker
- 1 pair of Goatskin Gloves:  
(You specify size)
- 1 Protector Bee suit:  
(You specify size)
- 1 book: First Lessons in Beekeeping

# Hive Bodies & Supers

## Beeline boxes: why choose them?

Please note: Boxes made by the Washington Manufacturing Branch may be different. Please contact them for details.

### Options:

- Four Sizes: 9 5/8", 7 5/8", 6 5/8" & 5 11/16"
- 10-frame, 8-frame or 5-frame
- Select, Commercial, Budget or Mill-run Grades
- Unassembled
- Assembled
- Treated/Dipped with Copper Monoethanolamine\*
- Painted White (Custom color optional\*)
- Wax Dipped
- Custom ID Stamping (Additional fee per box)\*

\* Only available from the Michigan Branch

Need one or thousands? We can do it! Just contact us.

### Deep Hive Body

Our deep boxes are standard 9 5/8" in depth, and are milled with 5/8" frame rests and deep, profiled, uppercut handholds that are easy to grip and allow water to run off the bottom. With a full top joint plus snug fingerjoints all the way around, these boxes are built for the long haul.

White is our standard paint color, but we can paint your boxes a custom color with a \$50 fee per color per order. The Michigan Branch offers custom ID stamping for a fee. Ask for details.

Commercial and Mill-run Grades are produced and stocked on a regular basis. Contact us for select or budget grade availability and pricing.

# Nuc Equipment

Contact us for commercial or budget grade availability & pricing.

## Deep Economy Nuc Kit

If you purchase 5-frame nuc lids, deeps, and bottom boards separately you will get a narrow version of the 10 frame equipment described in previous pages. However, the economy nuc gives you a much cheaper option. Excellent for making up nucs to sell. These economy nucs consist of a deep nuc hive body (9 5/8" wide), a simple board with 3/4" strips on top to make an entrance for bottom board, and a simple migratory style lid made of a board with dropped lips front and back. The inboard feeder on page 44 works well with these. Fingerjoint listed, but rabbet joint is available upon special request.

### Mill-run Grade

## Plastic EZ Nuc

This well ventilated, durable, five-frame, corrugated, plastic nuc box from Jester Bee Co. offers a cheaper alternative for nuc production and handling. The snap action entrance closure makes closing and transportation a breeze. There is also a knock-out hole that can accept the EZ Nuc Feeder (on page 42 providing no mess top-feeding).

## Nuc Transport Bag

Don't want to risk a sting while transporting your nuc? This durable, mesh bag is designed to take care of that problem for you! The breathable mesh allows your bees to get the air flow they need and the drawstring keeps the bees securely where they belong. These are ideal for nuc-raisers to have available for their customers.

# Frames

## Beeline frames: why choose them?

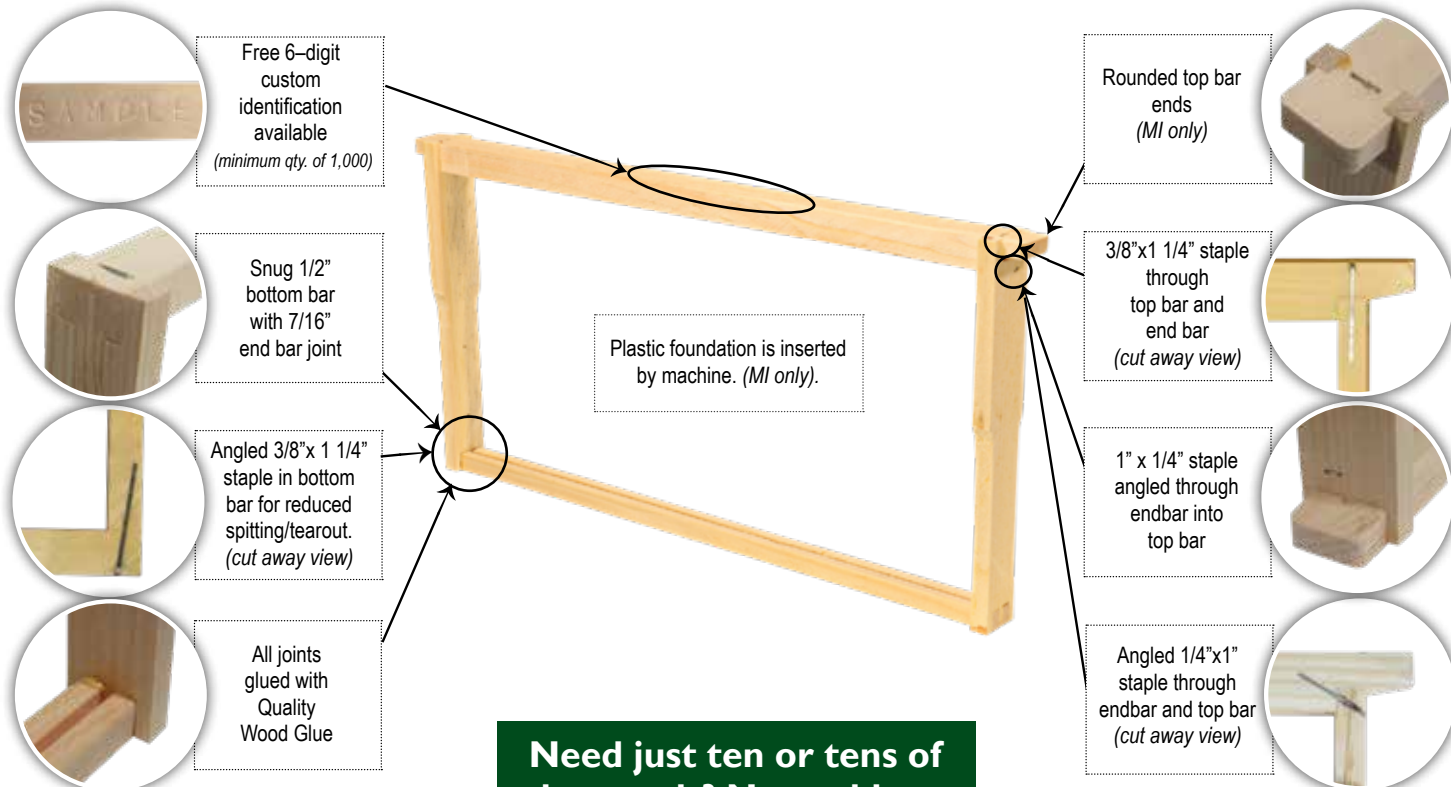

### Options:

- Four Sizes: 9 1/8", 7 1/4", 6 1/4" & 5 3/8"
- Commercial or Part-Budget Grade
- Unassembled
- Assembled (see details below)
- Wedged or Grooved Top Bar
- Grooved or Split Bottom Bar
- Holes in End Bars for Wax or No holes for Plastic
- Rounded Top Bar End (MI only)
- Square Top Bar End (WA only)
- Sturdy 1/2" Bottom Bar (MI only)
- Full 7/16" End Bar (MI only)
- Full 3/4" Top Bar

### When we assemble:

At our Michigan Branch, all frames are assembled with an automated machine, designed and built by Beeline staff to ensure high speed operation and consistent glue and fastener placement. At our Washington Branch, all frames are assembled by hand using our frame assembly jigs as described on page 18.

**Need just ten or tens of thousands? No problem.**

### Foundationless Frames

These foundationless frames are made with a triangular profile on the underneath side of the top bar to provide a starter strip for bees to build their own comb. Beeline sells them exclusively through their dealer, Isabees. Contact Isabees for pricing and more information.

**Contact:** Isabees Beekeeping & Supplies  
**Phone:** (314) 894-8737  
**Web:** www.isabees.com  
**Email:** info@isabees.com  
**Address:** 765 Gravois Road, Fenton, MO 63026

### Green Drone Frames

For two reasons. Raise more drones of your favorite genetics to increase drone population for mating purposes. But, perhaps more importantly, in this age of mites, use it as a tool to reduce mite population. Put these drone frames—you will always recognize them by their conspicuous off-green color—into the brood chamber. One per hive is enough. Pull the frame when the drone brood is capped and replace with another drone frame. Put the removed frame in the freezer. Repeat the cycle when the current frame is capped. Mites prefer drone brood and by doing this you will greatly reduce your mite population. But WARNING! Keep track of your timing! If those drones start emerging before you pull the frame, you have created a mite farm instead of a mite eliminator!

Size	SHIP WT:	CAT#	10-99
Deep	.65 #	GDD	4.60
Medium	.56 #	GDM	4.32

### Frame Assembly Jig

Make your frame assembly easier with our improved assembly jig. Now built to accommodate both deep and medium sizes in one jig! Securely clamp the end bars for 10 frames, glue, and add top bars and bottom bars and nail or staple. See instructions for use below.

	SHIP WT:	CAT#	Price
Deep & Medium Combo Jig	13 #	FAJDM	94.30
Shallow	7.95 #	FAJS	42.27

By following these steps, you can ensure a solid square frame, using this assembly jig.

**Step 1:**  
Apply glue to stack of 10 endbars and insert into jig.

**Step 2:**  
Insert top bars into endbars and staple with 3/8" crown 1 1/4" leg 18 gauge staples.

**Step 3:**  
Flip jig upside down. Lay out 10 bottom bars and run a bead of glue along ends.

**Step 4:**  
Insert bottom bars and staple with same staples as used for top bars.

**Step 5:**  
Unclamp. Lift jig to remove frames.

**Step 6:**  
Sight and adjust for parallel and square

**Step 7:**  
Staple through end bar into top bar using 1/4" crown 1" leg staples.

# Honeycomb Production

### Split Top Bar Frames

Our split top bars make a convenient alternative for fast preparation for comb honey production. Assemble the frame and then, with the aid of a board with two nails to spread the split, slip the cut comb foundation or starter strip into that split. When removed from the nails, the top bar will clamp the foundation and the frame is ready for the bees. Available from the Michigan Branch only.

# Foundation

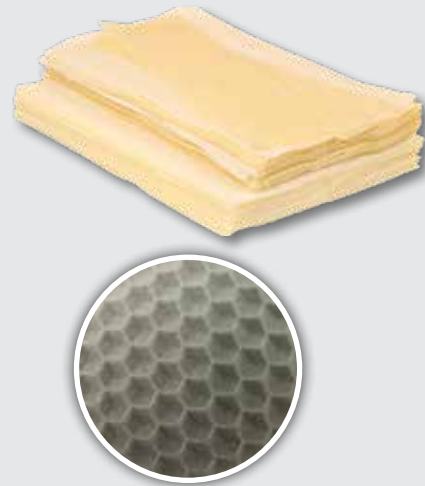

## Crimp Wire Wax

Using Dadant's wax-working program, we are able to provide an excellent quality crimped and hooked 100% beeswax foundation in the following sizes and quantities. We will try shipping your foundation during winter with your woodenware order but only at your request and with the understanding that there could be some breakage. We will not assume responsibility for replacement. If you do not want the risk, we can wait till warmer weather to ship your foundation.

## Equipment you may need to use wax foundation...

Orange Prices Qualify for Free Shipping on Orders over \$150!

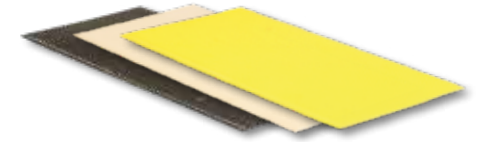

## Plastic Foundation

With the quality foundation we carry, expect your bees to draw the comb faster and more uniformly. Coated with 100% pure cappings wax, beekeepers from all over the country have considered it one of the best foundations on the market.

While all sizes are available in black, white, and yellow, we recommend black for deep inserts and white or yellow for medium and shallow. Black is preferred for deeps because it is easier to see eggs. White or yellow is preferred for honey supers because it allows you to evaluate honey color better.

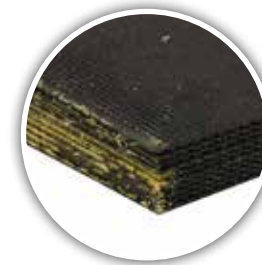

The single wax coating draws well and the double waxed coating draws better. Triple wax coating is available upon special request.

## Migratory Lid

The lid for the commercial beekeeper. The main part of this lid is made of weatherproof radiata pine plywood at the MI Branch, and tongue-and-groove panels at the WA Branch. The end cleats attach to this with a 1/4" deep groove with 1 5/8" for a skirt and 3/8" above. Another piece fastens flat-wise to the top. This piece also has a 3/8" thick lip to come out over the skirt pieces. This eliminates the crack that would allow water into the plywood ends. We recommend using long nails or 2" staples through that 3/8" lip and down through the end to bind it all together so that the skirts do not break off so quickly.

Contact us for select and budget grade availability & pricing.

*Hive Bottoms*

**Screened Bottom Board**

Designed to be versatile, sturdy, and easy to use, this bottom board stands alone. It needs no other bottom boards or add-ons to function. A 1/8" mesh screen covers the entire floor allowing for greatest ventilation and mite drop possible. 3/4" strips around three sides provide the entrance. A white corrugated plastic tray slips in the back on a track below the screen to monitor mite drop. By using 1 3/8" stock for two interlocking wood components we have achieved a very strong, durable construction. Since it is not necessary to have a mite tray for every bottom board, they must be ordered separately.

### Bee Pallets

### Solid Bee Pallets

These heavy-duty bee pallets are made with pressure treated rails and runners and decked with new HDO plywood. Spaces for 4 hives or 6 hives held in place with W-Clips that gives 1/2" between hives from side to side and 1 1/2" from front to back. Ventilation slot, drain holes and screwed construction make these pallets ready for the rough handling that characterizes commercial beekeeping. Nests when stacked.

4- Way Pallets measure: 45-48" x 33".  
6-Way Pallets measure : 50" x 44".

## Follower Boards

Hang these in the hive in the position of frames to limit the working space for small colonies within larger boxes and to restrict separate hives from mingling. These dividers help bees to maintain temperatures and gives a management tool for building nucs into full colonies without needing five frame nuc boxes. They fit snugly in a standard Langstroth box. Available in deep and medium sizes.

	SHIP WT:	CAT#	Price
Deep	2.0 #	FBD	5.70
Medium	1.26 #	FBM	5.47

## Entrance Reducer

This 3/4" x 3/4" entrance reducer can be used with our reversible bottom boards (page 25) and our screened bottom boards (page 25). Turned one way gives a 3" long entrance. The other gives a 3/4" entrance.

# Dura-Draft

Designed & Manufactured by Beeline

## Smokers with Dura-Draft Bellows

With our new and improved Dura-Draft Bellows fastened to heavy-duty imported smoker cans, whether you are a hobbyist or a commercial beekeeper, you are getting a superior smoker built for the long haul!

What is better about the Dura-Draft Bellows? Across the industry, bellows seem to be the weak part on a smoker. The fabric is prone to puncture and holes created after too much flexing. The plywood deteriorates with weathering. We have strengthened the weak parts with MDO plywood and a high quality UV resistant fabric. We have also double-walled the fabric at the bottom.

Item	SHIP WT:	CAT#	Price
10"	2.19 #	SMK10- BB	55.78
7"	2.04 #	SMK7-BB	54.63

## Beeline Bellows

Like your smoker can but need to replace the bellows? Our Beeline engineered and manufactured Dura-Draft bellows fit most standard smokers. Mounting brackets may need some modification.

Will it be your last replacement? Try it and see!

SHIP WT:	CAT#	Price
1 #	SBB	21.80

**MDO Plywood**  
Weather resistant and durable

**High Quality, UV Resistant Canvas**  
Resists punctures, cracking, and tears

**Extra Heavy Duty Canvas**  
Double-walled at bottom reinforces hinge point and adds extra protection from puncturing objects.

**Stainless Steel Fasteners**  
positioned to accommodate most brands of smoker cans

## Smoker Cork

When you're finished working with your bees, stop the smoke by plugging the smoker hole with this wooden cork. Keep the cork handy all the time by chaining it to your smoker.

## Queen Excluder Cleaning Tool

Scrape wax and propolis off your queen excluder with this handy tool. The teeth are spaced differently on either side to accommodate most metal excluders. This does not work with plastic excluders.

SHIP WT: .08 #	
CAT#	Price
QECT	6.89

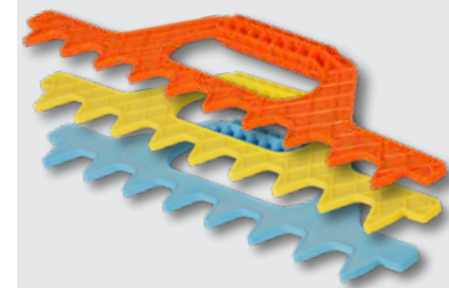

## Frame Perch

This sturdy, stainless steel frame perch holds three frames, making a handy tool for treating your frames of bees with care.

SHIP WT: .62 #	
CAT#	Price
FP	17.20

## Frame Spacing Tool

Space the frames in your honey supers uniformly with these spacing tools to ensure that the comb gets drawn and capped correctly. Nine frames in a box works well in a moderate honey flow and still makes uncapping easier. If there is a good honey flow, eight frames are even better. Gets nice, fat frames of honey, and allows for more honey in a super with one less frame.

	SHIP WT:	CAT#	Price
10-frame reduced to 9-frame	.213 #	FST9	9.15
10-frame reduced to 8-frame	.205 #	FST8	9.15
8-frame reduced to 7-frame	.205 #	FST7	9.15

## Frame Cleaning Tool

If you really want to reuse those old frames, this tool is a must-have to clean out the top and bottom grooves in preparation to insert new wax or plastic foundation.

SHIP WT: .05 #	
CAT#	Price
FCT	6.62

## Frame Grip, Metal

A nice little tool for handling frames with the least possibility of killing bees or otherwise leaving human contamination on a colony. Don't expect it to increase speed but if carefulness is your goal, we recommend this device.

SHIP WT: .58 #	
CAT#	Price
FGM	8.92

## Ultimate Gripper, Plastic

Yep, another "ultimate" from BeeSmart. And it is pretty nifty. A sturdy plastic frame grip with a built in J-tool and frame tool. Don't rely on them for the hard prys but they will do in a pinch.

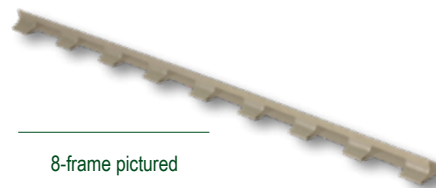

SHIP WT: .22 #	
CAT#	Price
UGP	9.88

## Frame Rest Inserts

Even though you might not want frame spacers to keep your frames off the wooden frame rest, these inserts provide a metal edge of protection to your frame rest.

SHIP WT: .05#	
CAT#	Price
FRI	.64

8-frame pictured

## Frame Spacer

Metal frame spacers are designed to space your frames easily and quickly. They fit in all 10 frame supers or hive bodies, and allow even bee space throughout the entire box.

Size	SHIP WT:	CAT#	Price
9-frame	.18 #	FS9	1.11
8-frame	.17 #	FS8	1.11

## Hive Butler Storage Tub

Designed to securely hold 10 Langstroth frames for storage. Can be used to hold, protect, and transport any other beekeeping paraphernalia necessary for the hobby industry. Durable and stackable.

SHIP WT: 7.02 #	
CAT#	Price
HBST	110.11

## Bee Vacuum

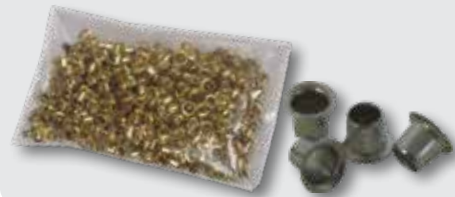

Built for the rugged environment of bee removal! With a large 7 gallon bucket, a powerful, battery powered, variable speed motor, and a 7 foot hose with an 18" nozzle, this will not let you down. The battery will last 6-8 hours per charge, and a charger is included in the kit. Works great for swarm and bee removals in any position.

The Basic Model does not include the backpack or retractable remote like the Go Getter Kit does. The Go Getter Kit also includes an extra nozzle. The Professional model includes an extra bucket.

Size	SHIP WT:	CAT#	Price

**Swarming**

**Swarm Trap**

Use this quality swarm trap to take the chance to own bees without buying them. Holds five standard Langstroth frames with extra space below - exactly what scout bees are looking for. Assembled from durable 3/8" plywood, just add paint, and this trap is ready to go!

Includes a strong built-in hanger bracket, making it perfect for hanging in a tree, along with our optional strap. The strap can be ordered separately below. (Entrance disc is not included.)

SHIP WT:	10 #
CAT#	Price
STA	59.80

**Strapping for Swarm Trap**

This heavy-duty strap can securely hold the swarm trap to a tree up to 22" in diameter, and holds up to 200 lbs.

SHIP WT:	.20#
CAT#	Price
STA-Strap	17.20

**Swarm Commander Products**

Swarm Commander's Premium Swarm Lure outperforms many other lures, including the common lemongrass oil. Available in four different applications, expect to catch many swarms when applying them correctly. All versions have a 2-year shelf life when stored in a temperature controlled area.

**Lure Spray - 2 oz.**

Lure bees into your swarm trap with Swarm Commander spray, a pheromone specially created to attract feral honeybees. With only 2 sprays per dose, this bottle will last for many swarms.

SHIP WT:	CAT#	Price
.05 #	SCLS	35.42

**Lure Gel**

This gel version of the Swarm Commander's Premium Swarm Lure will last up to 3 weeks in your trap, compared to the spray version which lasts 7-10 days per application.

SHIP WT:	CAT#	Price
.06 #	SCLG	24.73

**Super Lure**

Infused with Swarm Commander Premium Swarm Lure, this little object will attract a swarm once hung from a top bar in your hive trap. The pheromone lasts at least 90 days once opened.

SHIP WT:	CAT#	Price
.01 #	SCSL	17.89

**Crush Vials- 5 Pack**

By crushing a vial of Swarm Commander lure liquid, and swabbing it on the landing board of your hive trap, you can expect a swarm to be attracted to your hive in a short time.

SHIP WT:	CAT#	Price
.04 #	SCCV	18.40

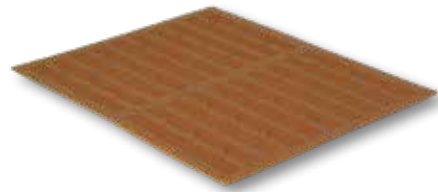

**Orange Prices Qualify for Free Shipping on Orders over \$150!**

# Traps

## Propolis Trap

With this plastic propolis trap you can harvest quantities of clean propolis and sell a value-added product from your hive. Put on the top of your hive in the place of the inner cover, block the hive cover up so that light can get into the hive. The bees will fill the cracks in the trap in an effort to block the light and seal the hive. To harvest, place propolis trap into a plastic bag and freeze. Once frozen twist the trap inside the bag to release the propolis. Fall is the time of greatest propolis collection.

### 10-frame

SHIP WT:	CAT#	Price
.53 #	PTP10	9.15

## Pollen Trap

Our quality pollen trap is designed for maximum trapping and versatility. Works best on the bottom of the hive.

### Features:

- Drawer can be inserted from either side, allowing for palletized usage.
- Weather proof drawer; pollen will not get wet.
- Full side drawer front; bees will not try to get in at wrong places.
- Escape cones and plywood covered area keeps debris out of pollen.
- Removable trapping strip to switch from trapping to no trapping.
- Entrance that stays the same for trapping and no trapping.
- Works with clip pallets.

# Queen Rearing

## Queen Catcher

Why catch a queen? Mark her, cage her, transfer her, protect her. These clamshells gives you a safe way to handle your precious bug. Available in stainless steel and plastic.

	CAT#	SHIP WT:	Price
Metal	QCM	.052#	5.75
Plastic	QCP	.033 #	4.03

## Queen Development Calendar Tool

Need some help to keep track of queen cell development to know how old it is, or when it will hatch? This pocket size tool, made from high quality plywood, will serve this purpose!

SHIP WT: .05#	CAT#	Price
	QDCT	16.68

## Queen Marking Pen

With a dot of this marking pen on the queen's thorax, you can more easily find her in future queen hunts and also monitor the age of the queen by using the corresponding year color. 2025's color is blue and will be shipped unless other colors are specified (red, yellow, white, and green.) Safe for use with bees.

SHIP WT: .05 #	CAT#	Price
	QMP	7.19

## Queen Marking Cage

What is a better aid to marking the queen, than a cage to trap her while you do it? Place this cage over the queen, gently press down until it holds her in place, then give your dab of paint. No need to catch the queen or to run the risk of her flying away, plus less risk of queen injury.

SHIP WT: .05 #	CAT#	Price
	QMKC	4.03

## Queen Marking Tube

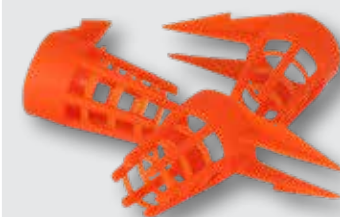

Scoop up your queen and gently push her down the clear tube with the foam plunger until her back touches the screen. This makes a safe and easy way to mark her through the screen.

SHIP WT: .05 #	CAT#	Price
	QMT	7.19

## Push-In Cell Protectors

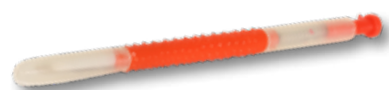

Place a mature queen cell (one that you raise or find) into this protector and insert into the surface of brood comb for the workers to care for.

### Queen Grafting Tool

This simple Queen Grafting Tool allows you to pick up a larva and then deposit it into a cell cup by pushing it off with the button activated slider.

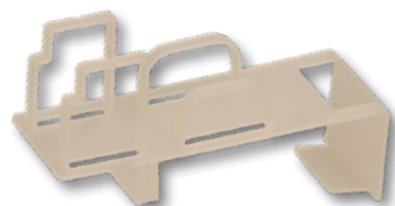

SHIP WT:	CAT#	Price
.005 #	QGT	3.40

### Wide-Base Queen Cell Cups

Fits in the groove of bottom bars, most top bars and the bars of our Queen Cell Frame. 2025's color is blue and will be shipped unless other colors are specified (red, yellow, orange, black and green.)

	CAT#	SHIP WT:	Price
10 Pack	QCC10	.02 #	1.60
100 Pack	QCC100	.20 #	15.00
1,000 Pack	QCC1000	2 #	140.00

### Queen Cage Holders

Installing queens in a cage into a hive is made easier with this Queen Cage Holder to hold your queen cage securely to a frame. Holds all styles of queen cages in perfect position.

SHIP WT:	CAT#	Price
.03 #	QCH	5.97

### Queen Mailing Cage

Standard wooden, 3-hole queen cage with screen and corks provided. You need to staple the screen in place (after queen and bees are inside, of course) and provide the candy.

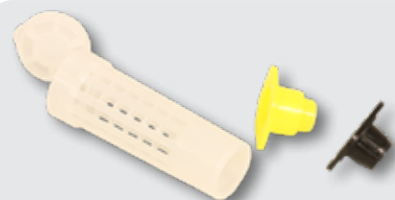

SHIP WT:	CAT#	1-9	10-49	100-499
.03 #	QMC	1.12	1.07	Call

### Queen Cage & Accessories

Speed up your queen caging with these cages, scented with a pheromone to increase acceptance, and roomy enough for a queen and her attendants to live, hide, and communicate from. Candy caps are also available, with an hour glass shape tube to hold the candy cap in place, keeping the queen from emerging. These caps come with a holding strip to hold your cage in place between frames. And do you need to bank or ship your queens? These cages fit perfectly into the shipping bars, making the process quick and economical!

Item	Qty.	CAT#	SHIP WT:	Price
Queen Cages	10 Pack	JZBZQC	.05 #	7.02
Candy Cap & Holding Strip	10 Pack	JZBZCH	.01 #	4.03
Shipping Bar- 1/2 Size	Single	JZBZSB	.04 #	2.52

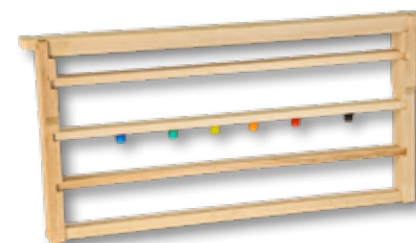

### Queen Roller Cages

A handy little queen rearing/protection system. The black part fastens to the underneath side of a bar. The yellow provides the cell cup. The white is the protective cage to contain an emerged queen for incubation, transport, and introduction. Sold in a 10 pack.

SHIP WT:	CAT#	Price
.20 #	QHCR10	5.18

Orange Prices Qualify for Free Shipping on Orders over \$150!

### Queen Cell Frame

With all the dimensions and construction of a normal frame, our Queen Cell Frame comes with three removable cell bars that accepts the Queen cell cups above.

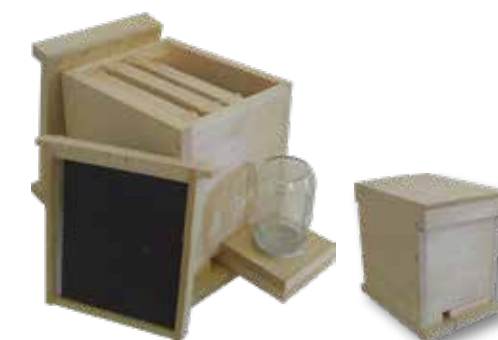

SHIP WT:	CAT#	1-9	10-49
.54 #	QCF	9.61	9.20

### Queen Rearing Hotel

This fully assembled, four compartment queen rearing box provides a similar tool as our mini mating nuc below. However, since this accommodates full sized frames, it provides the option of putting in a frame that has a queen cell on it to allow it to emerge. Then, after she has emerged and mated, you can take the frame with the mated queen and put it in any of your other hives that needs one. Each compartment allows two frames, but other numbers of frames can be used by removing the glass-board dividers. Will need a migratory or telescoping lid (see pages 22 & 23) to complete the setup.

Commercial		
SHIP WT: 17.22 #	CAT#	Any qty.
Assembled	QRHA	72.45
Painted	QRHP	79.35

### Single Compartment Mini Mating Nuc

A single compartment mating nuc with small frames. Designed similar to our economy nuc with an entrance designed to accommodate an entrance feeder or reducer. Order feeder separately. Choose between entrance feeder or division board type. Additional frames are available, listed below.

This product is being discontinued. Available while supplies last. Please call for pricing.

### Four Compartment Mini Mating Nuc

A four compartment mating nuc with small frames. This versatile unit is the same size as 10-frame boxes so that it can be stacked on top of another colony to pull comb, prevent wax moth, or facilitate other uses. Moveable dividers make it possible to convert two quarter-compartments into one half-compartment. Comes with a migratory lid and bottom board constructed to isolate the quarters from each other. Entrances to accommodate feeders and reducers for each quarter are on different sides. Feeders must be ordered separately. As an alternative to the entrance feeders, we offer a double-compartment division board feeder. Additional frames are also available, listed below.

This product is being discontinued. Available while supplies last. Please call for pricing.

### Mini Frames

Extra frames for the mating nucs above. Or, purchase these for mini mating nucs that you build. Available in deep or medium. Top bar is 9 1/16" long.

Pricing is the same as regular frames on page 17

# Feeders

## Ultimate Top Feeder

Much like the Ultimate In-Hive Feeder (below), but designed with a nipple that is inserted through a hole in the center of the Ultimate Hive Cover (see page 23) or any other lid. Two hold down bushings provided with the feeder can be screwed to the lid to lock the feeder in place.

SHIP WT:	CAT#	Price
1.06 #	UTF	23.00

## Ultimate Universal Feeder

Eliminate drowning with this all-plastic top feeder. Holds 1 gallon and functions like a quail feeder. Requires a medium depth super to accommodate.

SHIP WT:	CAT#	Price
1.36 #	UIF	24.73

## EZ Nuc Feeder

Designed for use on the Jester EZ nuc only (page 15). Locks into a slot on the lid of the nuc and provides a no mess, no drowning way to feed nucs. The clear container shows syrup level at a glance and design allows nuc inspection without removing the feeder or spilling syrup.

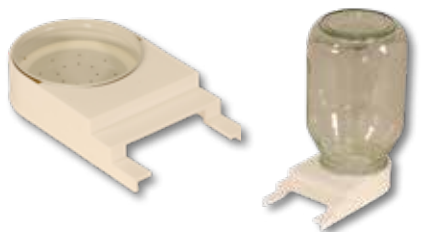

SHIP WT.	CAT#	Price
.83#	EZNF	13.23

## Entrance Feeder- Wooden

This standard entrance feeder made out of Eastern White Pine, comes with a narrow-mouth jar lid and fits in a 3/4 inch hive entrance. Jar not included. Extra narrow mouth lids with holes can be purchased separately, below.

Item	SHIP WT:	CAT#	Price
Wooden	.25 #	EFW	7.19

## Entrance Feeder- Plastic

The plastic entrance feeder comes with a narrow-mouth jar lid and fits snugly into a 3/4 inch hive entrance. Jar not included. Extra narrow mouth lids with holes can be purchased separately, below.

Item	SHIP WT:	CAT#	Price
Plastic	.19 #	EFP	6.85

## Feeder Jar Lid

Narrow mouth jar lid with small holes punched into it, to replace lids on entrance feeders.

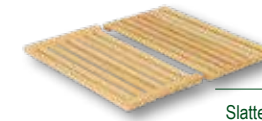

SHIP WT:	CAT#	Price
.03 #	NJL	1.14

Orange Prices Qualify for Free Shipping on Orders over \$150!

## Top Feeder

With each compartment holding one gallon, this two compartment feeder sits on top of the hive boxes, just under the inner cover. Bees access the feeding area through an open slot that runs cross-ways in the middle. After syrup is poured into the compartments, pine slatted floats can be placed on top of the syrup, preventing drowning. The bottom is recessed 1/8" to minimize rocking on burr comb left on the top bars of the box below it. When we assemble, seams will be caulked to ensure that it is leak-proof.

Slatted Floats

Orange Prices Qualify for Free Shipping on Orders over \$150!

**Inboard Feeder**

This 1 7/8" wide inboard feeder by the manufacturers of the EZ Nuc provides a durable, versatile solution for uses that require a narrow feeder. The cap and ladder design eliminates drowning and limits the consumption to simulate a trickle flow. When used right under a flat lid, a shallow rim will be needed to allow bees access.

**Only replaces one frame!**

SHIP WT.	CAT#	1-99	100+	Skid Qty.

*Health Products*

**Honey B Healthy Products**

We won't claim that you can keep bees in a greenhouse with no outside forage, but with these three products, we are providing for most of the nutritional and health needs of your colonies, all from the manufacturers of Honey B Healthy.

**Honey B Healthy**

An excellent tool in the arsenal against viruses and a stimulant for hive health. Made with essential oils including lemon grass and spearmint, this product has been a real boon for all who have used it, even saving some large beekeepers from disaster. We recommend mixing it with all syrup feedings and using it in a drench every time you visit the hive. Instructions for use will be included.

### Hive Alive Feed Products

#### Hive Alive

Hive Alive is a tested honeybee health supplement, made with OceaShield Irish seaweed extracts, to increase production, maintain general honeybee and gut health, reduce disease levels, improve nutrition, enhance immune function and improve over-wintering success.

# hives	SHIP WT:	CAT#	Price
10	.29 #	HA10	25.02
50	1.05 #	HA50	86.25
200	4.25 #	HA200	201.25
1000	21.12 #	HA1000	776.22

#### Hive Alive Fondant

Why look any further for a healthy, convenient bee food for the winter? With a 2-year shelf life, these all-natural patties are easy to store and use, and don't cause robbing like syrup.

	SHIP WT:	CAT#	Price
Single Patty	2.20 #	HAF1	8.34
Case of 15	34 #	HAF15	112.13
5 lb. Patty	5 #	HAF5LB	15.82

#### Hive Alive EZ Feed Syrup

No mixing, no feeders, no mess! How simple is that? With HiveAlive liquid in ready to use bags, this is the ideal liquid carbohydrate feed for your bees. Each box contains (9) 2 lb. pouches.

SHIP WT:	CAT#	Price
18 #	HAS	54.63

#### Megabee Powder

Custom make your own protein patties with this protein powder, or mix in light or heavy sugar syrup. A very natural, healthy, proven, and effective pollen/protein substitute.

	SHIP WT:	CAT#	Price
5 lb. Bag	5 #	MP5	27.60
50 lb. Bag	50 #	MP50	146.05

#### Pollen Patties

Ready-to-feed Global Patties, made with 4% real USA bee pollen, and 15.5% total protein, and a dose of Apis Biologix "Rocket Fuel", will give your honeybees a boost in brood production and health, and a balanced diet when they are unable to forage or when there is a shortage of pollen. Feed heavily in the spring for a faster build-up, and slower in the fall for a more steady build-up before winter, optimally with a carbohydrate source such as nectar or sugar syrup. Global patties have the effectiveness of three times increase of brood and 20% more adult bee population over other brands.

	SHIP WT:	CAT#	Price
2 pack	2 #	PP2	5.38

### Strong Microbials Products

#### Super Direct Fed Microbials

Super DFM (Direct Fed Microbial) is an all natural microbial probiotic supplement to be fed straight over brood nest top bars. Every serving of Super DFM contains 7 billion CFU's (colony forming units) of lactic acid bacteria, which work together to create optimal bee gut health. This helps to optimize digestion and nutrition, helping the bee to combat chalkbrood, fight mites, support pesticide detoxification, and increase hive immunity. Apply once a month. Highly recommended.

# hives	SHIP WT:	CAT#	Price
10	.244 #	DFM10	23.94
50	1.22 #	DFM50	75.64

2,000	22 #	DFM2,000	1247.71
5,000	55 #	DFM5,000	2924.34

#### SuperDFM + P801

Are you a beekeeper struggling with the effects that Pesticides are having on your bees, especially in pollination? New scientific research shows that *Pediococcus Acidilactici* (P801) rescues honeybees that have been exposed to Pesticides. Feed 1.5 teaspoons per hive every 30 days when colonies are active.

# hives	SHIP WT:	CAT#	Price
50	.244 #	DFMP50	97.75
500	5.6 #	DFMP500	402.49

#### Bee Bites

Packed with essential amino acids, vitamins and minerals, BeeBites enhances bee nutrition, immunity and vitality. The enzymes included improve overall bee health and helps to inhibit the growth of molds and fungi, like Chalkbrood or American Foulbrood. Place BeeBites right on top of the frames under your inner or outer cover.

	SHIP WT:	CAT#	Price
10 Bar Pack	1.10 #	BBITE1	3.74
10 lb. Brick	10.34 #	BBITE10LB	103.50

#### Superfuel Fondant

Rich in nutritional probiotics, SuperFuel Fondant is formulated to supplement natural nectar dearths and stress period, and to build up colony populations during critical times. This fondant is an excellent winter feed.

Cut this 10 lb. brick into the amount your hive needs, averaging 1-3 pounds per hive. Place it on top of the frames under your inner and outer cover.

SHIP WT:	CAT#	Price
10 #	SPFP10LB	92.00

#### SuperNectar

Building on the foundation of SuperFuel, SuperNectar offers the same nutritional and probiotic benefits in a concentrated powder form.

Feed before growth and during fall feeding, dearth, splits, or transportation. When feeding dry, place at least 1 scoop (5g) directly on the top bars of your brood frames. When feeding liquid, use 5 grams per gallon, or when mixing into patties, mix in 5 grams per pound.

## Api Tablet

Looking for a simple and effective way to boost your colony's health? Call them "bee cookies" if you wish. They are packed with vitamins, minerals, amino acids, enriched with all-natural essential oils and sugar and assist in raising clean, healthy bees. Place one tablet on top of the frames in each brood box. They can be applied once in the Fall and once in the Spring.

SHIP WT:	CAT#	Price
1.54 #	APITB10	40.25

## ApiBioxal

Api-Bioxal is your oxalic-acid based treatment that is EPA approved for combating varroa mites. It can be applied by dripping or using in the oxalic acid vaporizers below and on the next page.

Size	SHIP WT:	CAT#	Price
35 gram	.08 #	APB-35	12.88
350 gram	.82 #	APB-350	50.03

## VarroSan

With VarroSan strips releasing oxalic acid slowly, you can treat mites effectively and naturally! Safe to use during honey flow, it is the most effective when outside temperatures are above 60 degrees and the bees are very active within the hive. Four strips are used per 10 brood frames and treatments can last 42 to 56 days. Shelf life is 24 months.

Size	SHIP WT:	CAT#	Price
20 Strips	1.75 #	VXS20	27.60
60 Strips	5.11 #	VXS60	93.73

## EZ Ox Tablets & Powder

The EZ OX Tablets are a clean and effective oxalic acid product that must be used with a vaporizer. The EZ OX Powder may be used with a vaporizer or may be mixed into sugar water as a treating solution when feeding. The best treatment practice is to treat in August when the mites are the worse, 4 treatments 4 days apart, and again in December or early January when the bees are flying.

Size	SHIP WT:	CAT#	Price
Tablets	.15 #	EZOXP400	26.40
Powder	.90 #	EZOXT50	14.94

## OxaVar Vaporizer

A heavy duty oxalic vaporizer. Made of stainless steel and powered by a car battery, this unit, along with oxalic acid provides a very effective and easy way to kill mites before they go into winter. Imported brand.

### Fumidil B

A very effective antibiotic treatment for Nosema. Mix in sugar syrup for spring and fall treatments. Available in 25 gram and 500 gram containers. Feed in the fall with 2 gallons of syrup per hive. Use with Honey B Healthy to encourage feeding.

Size	SHIP WT:	CAT#	Price
25 gram	.082 #	FD25	26.45
500 gram	1.12 #	FD500	252.99

### Mite-A-Thol

A safe and easy way to treat for tracheal mites. Use 1 50g pack in the spring and one in the fall.

Size	SHIP WT:	CAT#	Price
50 gram	.13 #	MAT.5	8.00
1 lb.	1 #	MAT1	53.77

### Para Moth

Use to keep wax moth under control in stored equipment. Place on the top of a stack of supers and cover the stack. Do not use on equipment with bees and air-out equipment well before placing on colonies.

	SHIP WT:	CAT#	Price
1 lb.	1.45 #	PM1	32.20
5 lb.	5.89 #	PM5	97.64

### Certan B402

This a treatment to prevent and control wax moth. Must be diluted in water to 5%. Safe to use, harmless to honey bees, it should be used after harvesting honey to kill young wax moth larvae. It does not leave residue in the wax or honey.

	SHIP WT: .43 #	Price
CAT#		
CB402		44.85

### Beetle Buster Baseboard

You have two choices: Fight the beetles or buy a Buster! Imagine a hive with no beetle infestation. The Beetle Buster traps Small Hive Beetles and makes it possible to have a stronger hive body by controlling the beetles. 10-Frame priced. 8-Frame available upon special request.

	SHIP WT: 9.34 #	Price
CAT#		
BBB10		179.40

### Beetle Towels

Effective and economical! Place one or two sheets at the place in your hive where beetles like to congregate. Since your bees will chew up the towels, creating a fuzzy trap, beetles will be unable to escape once they enter that trap. Replace the sheets when they are filled with beetles and repeat the process. Towels are approx. 13" x 12". Sold in packs of 5 sheets.

	SHIP WT: 1 #	Price
CAT#		
BT5		12.08

### Beetle Blaster

Those ugly, unwanted little pesky hive beetles meet their end in this trap. Just fill with a small amount of vegetable oil and insert between top bars. Discard after use. All natural.

	SHIP WT: .02 #	Price
CAT#		
BB		2.18

# Honey Harvesting

## Honey B Gone

An all-natural solution for removing bees from supers before removing honey. No more stinky stuff! Spray on the fabric side of the fume board and once placed on the hive, wait 5-10 minutes for the bees to move out of the honey supers.

Size	SHIP WT:	CAT#	Price
Pint	1.15 #	HBGP	29.90
Gallon	9.17 #	HBGG	128.80
5-gallon	45 #	HBGB	Call

## Honey Robber

The easy, quiet, and fast way to remove bees and pull honey. To be sprayed on the cloth surface of our fume board (below) and placed on the top of the hive. Bees don't like it and run away. After a few minutes the box of honey is free of bees and ready to be removed.

Size	SHIP WT:	CAT#	Price
Pint	1.15 #	HRP	31.63
Gallon	9.17 #	HRG	159.85
5-gallon	45#	HR5G	Call

## Fume Board

The "black box" of honey removal—literally (but no magic). Spray "Honey Robber" or "Honey B Gone" on the cloth surface, remove the lid and inner cover of the hive, place on top and turn PVC elbow into the wind. Wait a few minutes and the first box of honey is bee free and ready to remove. Works well on cloudy days as well as sunny. With several of these, honey can be pulled from a yard of many colonies in a short time.

## Triangle Bee Escape

This is the sophisticated version of the simple plastic escape (next item) allowing for more bees to get away faster with more ventilation. Insert upside down (from picture) under honey supers to be harvested. Wait a day or two and come back to remove the bee-less boxes of honey. Quite kind to the bees and you!

## Inner Cover Bee Escape

Put this little gadget in the oval of the inner cover (page 24). Put the cover between the supers you want to remove and those you don't. Close hive for a few days, then return to remove supers. It's that simple!

SHIP WT:	CAT#	Price
.018 #	ICBE	3.74

## Bee Brush

Don't want the extra expense, equipment, and smell of Honey Robber? If you have a little more time, this bee brush will safely remove the bees from your frames—one frame at a time.

SHIP WT:	CAT#	Price
.16 #	BBR	8.63

## Knife with Controller

Looking for a way to speed up your uncapping process? Try this heated knife which includes a temperature thermostat which is controllable. It takes a steady hand to uncap fast, but its a great help! Very similar to the knife below.

SHIP WT:	CAT#	Price
1.22 #	HUKTC	77.05

## Heated Uncapping Knife

Want speed for your uncapping process? Get hot! This heated knife is automatically thermostatically controlled (non-adjustable) and with a little practice, will increase your uncapping speed.

SHIP WT:	CAT#	Price
1.19 #	HUK	48.30

## Serrated Uncapping Knife

A cheap option for removing the cappings from a frame of honey. You might have to work a little harder than with a heated knife, but this little tool is a fraction of the cost for the hobbyist.

SHIP WT:	CAT#	Price
.335 #	SUK	14.67

## Honey Scratcher

Ok, you have to deal with the cappings. You can't get the honey out unless you get through all those little lids. This is the cheapest, fastest method we know (albeit a bit messy). Don't plan for cappings to melt down, but very economical for the hobbyist with a small job. Also useful by the bigger beekeeper to remove cappings in hard-to-get-to places. Oh, and it makes a good tool for removing drone brood to check for mites too—if you can stomach the process.

SHIP WT:	CAT#	Price
.1 #	HS	6.85

## Ultimate Capping Slicer

This nifty plastic tool from BeeSmart has two choices of slicing depths and a pry bar at the opposite end. Similar to a capping scratcher, but intended to cut, not tear the cappings - a little less mess. Works well with the Ultimate Uncapper on the next page.

SHIP WT:	CAT#	Price
.12 #	UCS	6.96

Orange Prices Qualify for Free Shipping on Orders over \$150!

### Uncapping Roller

This is a simple, fast, cost-effective solution to dealing with the cappings of honey frames to release the honey. You won't get cappings to melt down for pretty candles, but you will get your uncapping job done efficiently.

SHIP WT:	.48 #
CAT#	Price
UR	11.22

### Ultimate Uncapper

This partial, lid-like piece of plastic fits on a 5-gallon bucket and provides a cheap and convenient uncapping solution from BeeSmart. Works well with Ultimate Capping Slicer on page 55.

SHIP WT:	.91 #
CAT#	Price
UU	19.55

### Double Strainer

A two-screen strainer to rough filter your extracted product. Honey is ready for consumption if you don't mind some visible particles of naturally occurring hive debris—a sign that it is really raw! (Omit this device if you want really, really raw-looking honey—a few bee legs, etc.) If you want even more filtered honey, use the filter cloth after running the honey through this double strainer. Adjustable 10-15 inches.

SHIP WT:	2.06 #
CAT#	Price
DS	32.20

### Filter Cloth

Can be stretched over the top of a bucket or tank or place over the double strainer for additional support. This isn't ultra-filtering, but it does achieve that clear, clean appearance for the perfection-minded hobbyist and customer. (It will still be raw honey and just as healthy. It just won't have the visible evidences.) 5' x 3'

Size	SHIP WT:	CAT#	Price
5'x3'	.28 #	FC4	14.38

### Strainer Set

Same strainer set that comes with the bucket and gate, sold separately. Set of three: 600, 400, and 200 micron.

SHIP WT:	.452 #
CAT#	Price
SS	29.90

### Bucket with Gate and Strainer Set

Five gallon pail with strainer set and honey gate. Drain from your extractor into the pail and bottle the filtered, ready-to-sell raw honey into your jars.

HGP	8.92

### Stainless Steel Honey Gate

Tired of breaking plastic honey gates? This high quality, stainless steel gate shouldn't let you down. With a 1.5" diameter female thread, it can be used on any of our Maxx tanks and extractors. You can try it on a bucket, but it's not ideal.

SHIP WT:	.30 #
CAT#	Price
HGSS	27.55

### Perfection Honey Gate

A clean and cost effective lever action honey gate with O-ring and nut. Turn any tank into a bottling tank!

SHIP WT:	.69 #
CAT#	Price
PHG	19.55

### Dripless Bottling Valve

Truly, dripless! No more wiping honey off the edge of the honey gate, or waiting for it to stop dripping! Simply pull down the handle and honey comes out. Release the handle, and it stops, immediately! With the speed, accuracy, and smoothness of this valve, your bottling experience will improve greatly! Heavy duty construction, this valve is ready for the serious honey bottler!

SHIP WT:	3 #
CAT#	Price
DBV	97.75

### Pail Perch

Need to drain one bucket into another? Try this stainless steel pail perch which sets neatly on a 5 gallon bucket, holds another bucket at the right angle for easy drainage.

SHIP WT:	#

# Honey Extracting

## Hive Butler Uncapping Tub

Using two hive butler totes, this combination provides an upper tub with a screened bottom for draining cappings and slots in which to hang the uncapped frames until you are ready to extract them. A frame with a spike in the center is also provided to make uncapping easier. This is placed over in another tub that collects the honey draining off of cappings and frames which can be drawn off through the honey gate. A solid lid can be snapped on top to keep bees and dirt out until you can clean up the mess.

SHIP WT: 13.24 #	
CAT#	Price
HBUT	205.85

## Professional Uncapping Tank

Looking for a heavy-duty uncapping tank that can handle the capacity of a medium sized extractor? Here it is! This stainless steel tank can hold up to 28 frames and has a large pair of grates to catch the cappings and drain the honey downwards. The v-shaped tank bottom funnels down towards the honey gate. 4 caster wheels allow the tank to be maneuvered easily and lock in place to keep the tank where you want it. It works well with both deep and medium frames.

Size	SHIP WT:	CAT#	Price
41" x 22" x 39"	58 #	PROUT40	869.37
30" x 20" x 33"	48#	PROUT30	730.23

## E4 Extractor - 4 Medium / 2 Deep Frames

Smaller, yes, and simple, yes, but what a dandy little machine! It is capable of handling 2 deep frames or 4 medium/shallow frames tangentially. Place frames in baskets, crank handle till the one side is extracted. Reverse frames, crank again. Repeat till honey is satisfactorily removed. Draw honey easier with the sloping tank floor. There are bigger, faster, more efficient machines, but for the hobbyist, this little stainless steel beauty will do all that needs done. And an additional great feature is the free spinning gearbox handle, in which the handle stops turning when you stop cranking. No more surprise bruises! 3 year warranty.

# Bottling & Containers

## Maxx Honey Storage Tank

Just the companion you need to your growing line of honey harvesting equipment! And if you consider yourself a sideline, you won't want to do without it. Made from quality 304 food-grade stainless steel, this tank features a secure lid with 3 latches and a tight seal, a sloping floor directing the honey effortlessly towards the honey gate and into your container. Two strainers, one course and one fine, are included for filtering your honey down to around 600 microns before bottling. These tanks include a 3 year warranty.

- 9 Gallon Dimensions (with strainers): 32" tall; 13" diameter
- 18 Gallon Dimensions (with strainers): 35" tall; 17" in diameter.

# Overwintering

## Sugar Brick

This durable, substantial, 5-pound block of sugar laced with Honey-B-Healthy and other good ingredients is a tried and proven winter survival tool. Use with a 3" rim (page 28) and place right against the cluster. 8 bricks come in a case.

SHIP WT:	CAT#	1-15	16+
4.81 #	SB	14.90	11.66

## Hive Alive Fondant

Why look any further for a healthy, convenient bee food for the winter? With a 2-year shelf life, these all-natural patties are easy to store and use, and don't cause robbing like syrup can.

	SHIP WT:	CAT#	Price
Single Patty	2.20 #	HAF1	8.34
Case of 15	34 #	HAF15	112.13
5 lb. Patty	5 #	HAF5LB	15.82

## Pro-Winter Feed

Pro-Winter Feed is another tool for winter survival. High in carbohydrates and low in protein that will not stimulate brood production. Just place 1-3 pounds under the inner cover (or between two brood chambers.) As brood begins in the spring, switch to a protein supplement such as the Pollen Patties on page 46.

Size	SHIP WT:	CAT#	Price
1 Gal. Bucket	10.75#	PWF1	28.18
5 Gal. Bucket	52.05#	PWF5	106.38

## Superfuel Fondant

Rich in nutritional probiotics, SuperFuel Fondant, made by Strong Microbials, is formulated to supplement natural nectar dearths and stress period, and to build up colony populations during critical times. This fondant is an excellent winter feed.

Cut this 10 lb. brick into the amount your hive needs, averaging 1-3 pounds per hive. Place it on top of the frames under your inner and outer cover.

SHIP WT:	CAT#	Price
10 #	SPFP10LB	92.00

Orange Prices Qualify for Free Shipping on Orders over \$150!

## Winter Chip Box

Moisture, not cold, is the winter-time enemy. Fight it with our chip box. Designed to hold about three inches of sawdust/ woodchips above a screen floor to soak up condensation. A 3 inch cavity below the screen allows for feeding with the sugar brick (previous page) and pollen substitute in the spring. Approx. 5 lb. bag of wood chips included with each box.

View of middle screen between chips and feeding space

# Books & Education

## First Lessons in Beekeeping

**Keith S. Delaplane**, 166 Pages

*First Lessons in Beekeeping* provides the new beekeeper with informative text and liberal color photos that demonstrate the techniques described. This edition features a touch of beekeeping history along with the modern practices needed for success with honey bees. Although designed to guide the beginner in the first steps to becoming a beekeeper, this book is one that all beekeepers can enjoy.

SHIP WT:	.75 #
CAT#	Price
BFLIB	13.52

## Starting Right with Bees

**Kim Flottum & Kathy Summers**, 138 Pages

Interested in starting beekeeping? Start right with *Starting Right with Bees*. A bit more comprehensive than *First Lessons in Beekeeping*.

SHIP WT:	.4 #
CAT#	Price
BSRB	13.16

## First Time Beekeeping

**Kim Flottum**, 128 Pages

Does beekeeping look exciting yet daunting? This book is for you. It is an excellent step-by-step manual for the very basics of beekeeping, including setting up and caring for your colonies, finding a good location for them, practical maintenance tips, bee problems and treatments, harvesting honey and overwintering.

SHIP WT:	1.18#
CAT#	Price
BFTB	29.89

## The Backyard Beekeeper

**Kim Flottum**, 167 Pages

Excellent written and beautifully illustrated, *The Backyard Beekeeper* is filled with the wisdom, lure, and occasional humor of *Bee Culture* long time editor, Kim Flottum. Enjoy!

SHIP WT:	1.6 #
CAT#	Price
BBB	25.88

## The Beginner's Guide to Beekeeping

**Daniel Johnson & Samantha Johnson**, 160 Pages

This picture-filled, simple-to-read guide acquaints the reader with the basics of beekeeping and serves well to whet the appetite for bees and, of course, their honey. Remember, beekeeping "gets into the blood", and this book is a good injection.

SHIP WT:	1.11 #
CAT#	Price
BBGTB	21.80

## Beekeeping for Dummies

**Howland Blackiston**, 478 Pages

With the typical mixture of "dummy book" wit and practicality, this one gives a well-rounded, illustrated resource for the beginner and the long-timer. Consult it for the emergency situations or kick back with coffee and enjoy.

SHIP WT:	1.44 #
CAT#	Price
BBFD	30.42

Orange Prices Qualify for Free Shipping on Orders over \$150!

## Natural Beekeeping

**Ross Conrad**, 285 Pages

Want it organic? Or as organic as keeping bees can be? Ross Conrad's *Natural Beekeeping* is about as good as it can get. Good for the hobby beekeeper, but not exactly where you want to start. Be sure to get the basics before launching into a practice that will require higher levels of commitment and management.

SHIP WT:	1.86 #
CAT#	Price
BNB	40.20

## Keeping Bees with a Smile

**Fedor Lazutin & LeoSharashkin**, 345 Pages

"Bees can thrive on their own if we just allow them to," says Kirk Webster, a reviewer of this book. From an optimistic Russian beekeeper, learn natural methods of the local race, nurture their natural means to stay healthy, use extra-deep combs and propagate by swarming.

SHIP WT:	1.38 #
CAT#	Price
BKBWS	45.95

## Increase Essentials

**Lawrence Connor**, 176 Pages

Increase. Isn't that what every serious beekeeper is after? How do you maintain increase through the winter, provide a reliable source of fresh bees, and locally acclimatized queens, and replace hives and colonies for operational growth or for sale? This book will tell you.

SHIP WT:	.65 #
CAT#	Price
BIE	29.00

## Keeping Bees Alive

**Lawrence Connor**, 224 Pages

If you don't struggle to keep your bees alive and healthy, you are in the minority. This book covers the major issues of our day, such as environmental hazards, mite tolerance, breed varieties, maintaining bee population, sustainable management, and nutritional health, natural methods, and swarming.

SHIP WT:	1 #
CAT#	Price
BKBA	34.45

## The Beekeeper's Handbook

**Diana Sammataro & Alphonse Avitabile**, 190 Pages

A good option for getting started as a hobbyist, or sideliner, or commercial, as the case may be. *The Beekeeper's Handbook* lets few stones unturned when it comes to management and what goes on in the bees' world.

SHIP WT:	1.88 #
CAT#	Price
BBH	29.85

## The Hive and the Honey Bee

**Dadant and Sons**, 1324 Pages

A very comprehensive book, *The Hive and the Honey Bee* takes a chapter approach to exploring everything about bees. Much the same content as *ABC & XYZ*, just not as encyclopedia oriented with its scope and scholarship. This book could probably pass for the "Bible" of beekeeping.

SHIP WT:	4.37 #
CAT#	Price
BHHB	74.75

## ABC & XYZ of Bee Culture

**Al Root**, 911 Pages

Just as the name suggest, *ABC & XYZ of Bee Culture* is the beekeeper's encyclopedia. With topics arranged in alphabetical order, you can look up anything about bees: anatomy, history, problems, people, methods, do's, and don'ts. Very readable with pictures and diagrams.

### OTS Queen Rearing

**Mel Disselkoen**, 162 Pages

A little pricey, but we regard the "on-the-spot" queen rearing manual essential for raising your own queens, requeening, and making increase. It's not a magic wand but if the method is understood and followed carefully you should increase your beekeeping success rate and minimize losses from incompetent queens, old winter bees, and mites. Yes, that's what I mean, but you have to buy the book to find out why and how.

# Candle Making

### Beeswax Candle Molds

We are happy to offer you a collection of basic items for your candle making hobby! Our flexible molds will endure hundreds of pourings, leaving you satisfied with beautiful, exquisitely detailed candles again and again!

#### Basic steps to make candles:

1. Spray Mold Release inside your mold.
2. Thread the wicking through the hole at the bottom of the mold. Pull the wick 6" longer than the mold.
3. Make sure the seam in the mold is matched up as closely as possible. Secure those seams with rubberbands.
4. Secure the wick over the top of the mold (bottom of candle) using items like bobby pins or popsicle sticks. Keep the wick centered and straight but not too tight. Wick that is too tight or too loose will affect how your candle burns.
5. Pour your melted wax into the mold slowly and carefully.
6. Let your candle cool slowly. When completely cooled, remove the rubberbands and pull apart the seam.
7. Remove the candle from the mold and trim the wick at both ends.

CMR	21.88

### Candle Wicking

Two options: 60 Ply and 2/0 Ply cotton wicking for candles. 100' long pieces.

SHIP WT:	.031 #
CAT#	Price
CW60	12.71
CW2/0	10.50

Orange Prices Qualify for Free Shipping on Orders over \$150!

### Do we have dealerships?

Absolutely. Would you like to save shipping costs and pick up your order from a Beeline dealer close to you? On the previous page spread, pages 78 & 79, you will find information for most of our dealerships across the country. Find the one closest to you and contact them to make sure they have what you want and arrange pickup with them.

Our dealerships are not required to carry a full line of Beeline's products, so some may carry more of our products than others. But they exist to cut down shipping costs for you, so at least check with them! If they cannot provide the item(s) you are interested in, you may order directly from us.

Our dealerships are also not required to sell their products at our catalog pricing, so be prepared to pay different pricing than what is listed in our catalog or website.

No dealer in your area? Perhaps you or someone you know can help fill in the map!

### Can you become a Beeline dealer?

Quite likely. Our primary objective in establishing a dealership network is two-fold: to cut shipping costs for the customer and to broaden our customer base. By establishing dealerships across the country and shipping bulk to them, end customers can save shipping costs by driving to their local dealership to pick up their wares. In our supplier and dealership relationship, we want to work together for the good of the end customer. Our dealerships can be temporary (one time order for one year), or more permanent (standing yearly dealership status). Each comes under the same policy. To view the complete Dealership Policy, please contact your nearest branch and ask for a

mailed or emailed copy or visit this web page: [www.beelinewoodenware.com/dealerships](http://www.beelinewoodenware.com/dealerships).

Our dealer program is separated into three levels: Drone Level, Worker Level, and Queen Level. The benefits and requirements of this 3-Bee program are summarized in the chart below.

Who can deal? Anyone can deal who meets our requirements—sideliners, commercial beekeepers, hobbyists, dealers of other manufacturer's equipment, the retired, or anyone who is looking for a sideline or full-time occupation and a bit of income. To establish a dealership, we would need a state sales tax ID# to confirm resale status and a signed dealer application stating your willingness to cooperate with our policy guidelines. Find a copy of this application form at the back of the Dealership Policy pack you request from us or that you download from our website.

Call or email your nearest Branch to determine eligibility in your location. We will review the protection status of any existing Beeline dealership near you and accept or decline your application accordingly. A dealer's protection status is determined by their initial order totals, or annual sales totals, according to the level that they choose. See chart below.

When figuring dealership discounts, all catalog quantity breaks and discounts are disregarded. If you are not able to meet the requirements for a dealership, we also welcome wholesalers based on our catalog quantity pricing.

We also welcome associations, clubs, and bee schools, to pool orders that can be eligible for dealer discounts without the dealership status. See more information about this in our policy.

Are you interested in joining our dealership network, filling a spot on the map, and pursuing a new opportunity for income? Contact us!

	Drone Level	Worker Level	Queen Level
New Dealer's Initial Order Total (After discount)	\$2,500	\$5,000	\$10,000
Annual Total (After discount)	\$8,000	\$15,000	\$30,000
Standard Woodenware Products* & Protective Clothing Discount (from Beeline's In-Store Base Price)**	20%	25%	30% on all orders over \$10K 25% on all orders under \$10K
Resale Items Discount	Discount varies depending on product category and/or item. Please request dealer pricesheets for prices.		
Protection Status	None	60 miles between dealer locations	80 miles between dealer locations
Shipping Costs	All shipping costs will be passed on		
Payment Terms	50% deposit within 2 weeks of order date to secure pricing and production		
	Balance due within 30 days from ship/invoice date		

\*There are some specialty woodenware products that are not eligible for discounts.

\*\*Beeline's Catalog & Website prices are higher to accommodate free shipping. Please request dealership pricesheets for your dealer level cost and Beeline's base price.

**Download our dealership policy here: [www.beelinewoodenware.com/dealerships](http://www.beelinewoodenware.com/dealerships)**

# Ordering & Shipping Policy

### To place your order:

We prefer small orders to be placed and paid for online as much as possible. Shop online at [www.beelinewoodenware.com](http://www.beelinewoodenware.com).

A printable order form is also available online to download and fill out. You are also welcome to call or e-mail your nearest Beeline branch in MI or WA and be prepared to provide the following information:

1. Name
2. Mailing and Shipping address
3. Phone number
4. Email address (optional)
5. Quantities and Catalog numbers for products you are ordering.
6. Credit/Debit Card information including 3-digit code and billing address. (We do not recommend emailing credit card info. Please call instead.)

### Product Pricing

Our products are priced for material, labor, overhead, and profitability. In our catalog and on our website, all product prices include a percentage to cover shipping costs in order to provide "free shipping" on most orders over \$150. Due to fluctuating raw material costs, prices are subject to change without notice.

### State Sales Tax

We are required to collect sales tax in the states of Michigan, Indiana, Pennsylvania, and Washington. If you are exempt from sales tax, we are required to file a signed tax exemption certificate. Please call or email us for that form.

### Payment Terms

We expect payment up-front for small orders in the form of credit card or check. For orders over \$1,000, we expect a 50% down payment before shipping, with the balance due within 30 days of ship date. We accept cash, check, or credit card payment. Please make all checks payable to "Beeline."

After 30 days from invoice date, the bill will be subject to a finance charge of 1.5% per month. If payment does not meet these terms, Beeline reserves the right to require other payment terms for future business.

### Turn-around Time

Orders will be processed as quickly as possible. We will try our best to fulfill catalog and online orders within 2 business days and will notify you of any delays. Orders received after 12 noon will not be processed until the following business day. Skid-sized orders over 200 pounds may require up to a week or more, especially at peak season, which is generally January through June. Order early to ensure timely delivery. Full truckload orders usually require 1-2 months of notice. If you need something faster, just let us know. We'll check our inventory and schedule to see if we can accommodate it.

### Shipping

Orders can be picked up at our facilities by appointment or they can be shipped to you.

We are using UPS, FedEx Ground, or the US Postal Service for smaller boxed orders, and whichever LTL shipping company offers the best rate to your location for palletized shipments.

We offer free shipping on most small orders over \$150. All orange prices throughout this catalog qualify for free shipping. All black prices, which is usually higher volumes of product, do not.

For shipping estimates on all small orders under \$150 and larger orders that do not qualify for free shipping, please contact us. We will calculate the shipping costs as accurately as we can with small parcel carriers such as FedEx, UPS and USPS, or with LTL carriers. You may also want to check the dealership list on p. 78 and 79 to see whether you could drive for your wares.

On any shipments that do not qualify for free shipping, we include a handling fee. On palletized shipments, we include a pallet fee.

With the best of efforts in our stock-picking, we can still miss parts. If this occurs, give us a call, and we will take care of the issue according to our return policy. Call if you want more information on this policy.

### Pick Up Orders

Orders can be picked up at your nearest branch within store hours or by appointment. All orders picked up at a Beeline Branch will receive a 10% discount from catalog or website prices.

### Backorders

If your order contains out-of-stock items, we will contact you by phone or email with several options. We can ship your order without the backordered item and send the backordered item(s) separately, with additional shipping and handling charges. We can hold your order until the backordered product is available. Or you may choose to cancel that part of your order. We also have the option of filling your order in part or entirely from one of our other branches.

### Returns

Products may be returned to the Beeline Branch you purchased from if they are in as good a condition as you purchased it, and if you have the original invoice number. Please call the branch from which your order was shipped for verification.

For all returned merchandise that was shipped accurately but is no longer wanted, the return shipping cost must be the customer's expense. For all replacements for damaged items, or mistake corrections, return shipping costs will be covered by Beeline. No returns or exchanges may be made on Beeswax Foundation, Medication, Containers, Glassware or Bee Food. All products shipped from our facilities are shipped F.O.B. and become the customer's responsibility.

For more information about our company terms and conditions, visit [www.beelinewoodenware.com/terms-conditions](http://www.beelinewoodenware.com/terms-conditions).
